

Digital Discovery High Speed Adapter and Logic Probes

SKU:
410-349

Product Description

The High Speed Adapter, for the DIN_USR connector on the Digital Discovery, is an alternative to the 2X16 flywire assembly. It provides access for up to 24 High Speed Logic Probes and allows increased sample rates for up to 800MS/s on the Digital Discovery. The adapter is not keyed, and both orientations can be used as the twisted wires are not color-coded.

Features:

- Alternative to the 2x16 flywire assembly for the Digital Discovery
- Provides increased sample rates of up to 800MS/s on the Digital Discovery
- Ships with 16 High Speed logic Probes

What's Included:

- One High Speed Adapter for the Digital Discovery
